Step 2

Add languages

Creation method

Traditional

Generative AI

☒ Create a blank bot

Create a basic bot with no preconfigured languages, intents, and slot types.

☐ Start with an example

An example bot has preconfigured languages, intents, and slot types. You can change these settings.

☐ Start with transcripts

Automatically generate intents from conversation transcripts that you upload. Only English (US) language is available when starting with a transcript.

Bot configuration

Bot name

HotelBookingBot

Maximum 100 characters. Valid characters: A-Z, a-z, 0-9, -, _

Description - optional

This description appears on bot list page. It can help you identify the purpose of your bot.

IT HelpDesk bot for employees in the North America office.

IAM permissions

Info

IAM roles are used to access other services on your behalf.

Runtime role

Choose a role that defines permissions for your bot. To create a custom role, use the IAM console.

☒ Create a role with basic Amazon Lex permissions.

☐ Use an existing role.

Creating a role takes a few minutes. Don't delete the role or edit the trust or permissions policies in this role until we've finished creating it.

New role

Amazon Lex creates a runtime role with permission to upload to Amazon CloudWatch Logs.

AWSServiceRoleForLexV2Bots_Y00MY3CXP6G

Bot error logging

Info

Debug unexpected issues on Lex bots.

The top screenshot shows the 'Add language to bot' step in the Amazon Lex console. The bot is named 'HotelBookingBot'. The language is set to 'English (US)'. The description is optional. The voice interaction is set to 'Danielle'. The bottom screenshot shows the 'Intents' page for the same bot. A new intent named 'NewIntent' has been created. The intent is currently in the 'Draft' state. The console shows a message: 'We've added an intent to get you started.' The 'Save intent' button is visible at the bottom right.

Step 3: Create Intent

1. Go to **Intents**
2. Name: BookHotel
3. Click **Create**

Step 4: Add Sample Utterances

Add user sentences (how user talks):

I want to book a hotel

Book a room

Reserve hotel

I need a room

These are **Utterances**

Step 5: Create Slots (User Inputs)

Slots collect user information.

Add Slot

1. Click **Add slot**
2. Fill:
 - Slot name: age
 - Slot type: AMAZON.Number
 - Prompt: *Which city do you want?*

Mark as **Required**

Add IF Conditions (Conditional Logic)

Used to control flow based on slot values

Example Condition:

If {age} < 18

Steps:

1. Go to **Intent** → **Slots** → under **Advance options**
2. Scroll to **Slot capture: success response** → **Conditional branching**
3. Click **Add condition**

Example:

Condition:

If {age}< 18

Response:

Your not eligible for hoot booking?

Step 6: Create Slots (User Inputs)

Slots collect user information.

Add Slot

3. Click **Add slot**
4. Fill:
 - Slot name: location
 - Slot type: AMAZON.City
 - Prompt: *Which city do you want?*
5. Mark as **Required**

Repeat for other slots.

1. Click **Add slot**
2. Fill details:
 - **Slot name:**checkin
 - **Slot type:**AMAZON.Date
 - **Prompt:**
"What is your check-in date?"
3. Mark as **Required**
(Optional but recommended)
 - Add **Retry prompt:**
"Please provide a valid date (e.g., 2026-03-25)"
4. Click **Save**

Slot 7: Number of Nights (nights)

Steps:

1. Click **Add slot** again
2. Fill details:
 - **Slot name:** nights
 - **Slot type:** AMAZON.Number

- **Prompt:**
"How many nights will you stay?"
- 3. Mark as **Required**
- 4. Click **Save**

Step 7: Create Custom Slot Type

Save intent

Click on Back to intents

If you want custom values:

1. Go to **Slot Types**
2. Click **Add slot type** -> **add blank slot type**
3. Name: RoomType

Add values:

Single

Double

Suite

Save slot type

Now use this in slot: go back to intent

- Slot name: RoomType
- Slot type: RoomType

Slot type: RoomType

Draft version English (US) Not built English (US) has not built changes. Analyze Build Test

Slot type: RoomType Info

A slot type is a list of values used to capture values for a slot.

Slot type details

Slot value resolution

Amazon Lex resolves the slot values in an utterance to only the values you provide, or it expands the resolution to related or similar values.

Expand values (default) Values used as training data. Restrict to slot values Use only values provided.

Step 9: Add Response Cards (Card Groups)

Used for buttons (quick replies)

Steps:

1. Go to slot prompts -> more promptoptions
2. Click Add -> add card groups

Example:

Card Title: Select Room Type

click on add Buttons:

- Single → "Single"
- Double → "Double"
- Suite → "Suite"

Step 10: Configure Responses

Initial Response:

Welcome to Hotel Booking! What is your name?

The screenshot shows the Amazon Lex console interface. On the left, there's a sidebar with 'Amazon Lex' and a search bar. The main area displays the 'Initial response' configuration for the 'BookHotel' intent. It includes a text input field with the message 'Welcome to Hotel Booking! What is your name?'. Below this, there are sections for 'Response to acknowledge the user's request' and 'Message group'. The 'Message group' section is expanded, showing the configured message. At the bottom, there are buttons for 'Editor', 'Visual builder', and 'Save intent'.

Confirmation:

Do you want to confirm booking in {location} for {nights} nights?

The screenshot shows the Amazon Lex console interface for the 'Confirmation' configuration of the 'BookHotel' intent. It includes a section for 'Prompts to confirm the intent' with a message 'Do you want to confirm booking in {location} for {nights} nights?'. Below this, there are sections for 'Confirmation prompt' and 'Decline response'. The 'Confirmation prompt' section is expanded, showing the configured message. At the bottom, there are buttons for 'Editor', 'Visual builder', and 'Save intent'.

Step 11: Build & Test

1. Click Build

2. Use **Test chatbot** panel

3. Try:

Book a hotel

Sample output

User: Book a hotel

Bot: What is your age?

User: 25

Bot: Which city do you want?

User: Hyderabad

Bot: Check-in date?

User: Tomorrow

Bot: Number of nights?

User: 2

Bot: Select room type

User: Double

Bot: Do you want to confirm booking in Hyderabad for 2 nights?

User: Yes

Bot: Booking confirmed.
